

CM 23014 - STERILITY TEST MANIFOLD SYSTEM

INTENDED USE

Sterility test manifold system is primarily used for microanalysis of liquids for biological or particulate contamination under vacuum filtration.

PRODUCT FEATURE

- Constructed from 316 stainless steel.
- Available with 3 stations with PTFE Valve.
- Supports 47mm diameter filtration funnel for microanalysis of liquids.
- Secured assembly by locking nut on the funnel preventing any damage to the membrane.
- 316 SS screen (w/ Silicon gasket) ensure the clearance of particles from the filtrate.

APPLICATIONS

- Microbiological analysis of retained particles.
- Filtration of biological products such as Proteins.
- Filtration of solvents and aqueous solutions.
- Analysis of particulate matter.

PACKAGING

Pack Size: 1 Unit.

NOTE: Please consult the Material Safety Data Sheet for information regarding hazards and safe handling Practices.
