

## CM 23861 – OXACILLIN RESISTANCE SELECTIVE SUPPLEMENT

### INTENDED USE

For screening Oxacillin Resistant microorganisms.

### COMPOSITION

| Ingredients | Concentration |
|-------------|---------------|
| Oxacillin   | 1mg           |
| Polymyxin B | 25000IU       |

(per vial sufficient for 500 ml medium)

### INSTRUCTION FOR USE

Rehydrate the contents of one vial aseptically with 2 ml of sterile distilled water. Mix well and aseptically add it to 500 ml sterile, molten, cooled (45-50°C) OXACILLIN RESISTANCE SCREENING AGAR BASE. Mix well and dispense as desired.

### STORAGE

Vials should be stored in sealed container at 2-8°C.

|                                                                                                                                         |                                                                                                                                                                                                          |                                                                                                            |                                                                                                                             |                                                                                                                           |                                                                                                       |
